

CensorNet for Small Business

Enterprise class Web Security for Small Businesses

Frustrated by people browsing the web for non-work related sites? Tired of walking past a computer and seeing Facebook disappear quickly? Noticed that the speed of your Internet connection has dropped? Wonder how your Internet connection is being used? If these are some of the issues that you have thought about recently then you need CensorNet for Small Business.

- Improve productivity
- Increase security
- Improve network performance
- Improve compliance

Targeted specifically at small business and branch offices, the CensorNet SMB web security appliance delivers all the protection, management and compliance features normally found in enterprise class products for a fraction of the cost. This small device simply plugs into your network to give you complete control of the web.

As a business owner you can specify how, when and what your employees should access on the Internet during business hours. With CensorNet for Small Business you can quickly implement an Acceptable Usage Policy which can be as aggressive or as passive as you feel is right for your business.

Not only that, you can specify different access levels for members of staff based on their username or computer. You can use time quotas to find the right balance between personal and work related web browsing, allowing staff time to browse personal sites only during their lunch hour making them more productive.

With CensorNet, all web browsing history is recorded, so if an incident does occur you can demonstrate best practice and find out all the information surrounding the event quickly and easily. Take control of the Web today with CensorNet for Small business.
