

“Virtualization will transform how IT is managed, what is bought, how it is deployed, how companies plan and how they are charged.

According to Gartner, Virtualisation will be the highest-impact trend changing infrastructure and operations through 2012.”

Compatibility

The CensorNet Virtual Appliance is VMware Certified and also conforms to the Open Virtualisation Format standard.

- VMware Workstation/ Player
- VMware Server
- VMware ESX
- Any OVF compatible virtual environment

CensorNet Virtual Appliance for Web Filtering & Content Control

The CensorNet Virtual Appliance is a complete operating system that includes the CensorNet Professional software and is designed to run on virtual environments such as VMware. The Virtual Appliance is pre-configured and ready-to-run making it quick and simple to deploy CensorNet on any server platform.

The Virtual Appliance is ideally suited to organisations that wish to consolidate their software applications on to one hardware platform, reduce the costs involved with dedicated hardware and speed up deployment of new software.

Advantages of the CensorNet Virtual Appliance

- Rapid deployment - the CensorNet Virtual Appliance eliminates the manual installation process by being ready-to-run - just drop it into your virtual environment for an instant Web Filtering solution.
- Reduce the cost of equipment - there is no need for a dedicated server to run CensorNet. Use existing servers with spare capacity, run CensorNet on a Windows platform and more.
- Enhanced security - every aspect of the Virtual Appliance has been pre-configured and optimised to run CensorNet. All non-essential files and programs have been removed from the Virtual Appliance thus reducing vulnerability.

A virtual environment allows your organisation to:-

- Reduce infrastructure costs through more efficient use of Resources - turn the “one-application-per-box” servers into multiple application/operating system servers
- Respond faster to business needs so projects get deployed more rapidly.
- Increase the consistency and predictability of operations.

Try CensorNet Professional for yourself

Download the CensorNet Virtual Appliance from our Web site today and experience the benefits of a virtualised Web Filtering solution with our 14 day evaluation. Visit www.censornet.com or call 0845 230 9590 for further information.
